

Keeping your teams funded and mobile is easy with dash™, the expense management solution designed for any business looking to control spending and save time.

With improved expense management and a simplified reporting process, dash can save business owners and employees substantial time and money on accounting-related operations of day-to-day business. No more expensive, inefficient and risky practices of sharing company cards or needing employees to use their personal cards. With dash, you can conveniently send funds to your employees in real time from any mobile device.

Features

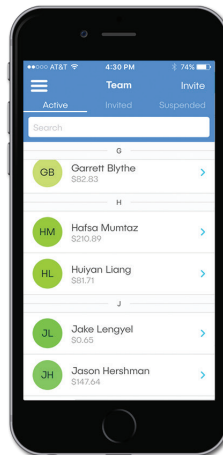

- Control company spending – Approval of expense budget prior to transactions.
- Issue cards quickly – Set up employees/contractors with cards at any time for free.
- Easy enrollment – No credit check. ID verification is the only requirement.
- Real-time visibility into expenses – Employee-level tracking and audit capabilities.
- Auto-approval – Assign monthly expense allowances for each team member.
- Reporting – Ability to extract data that can be used with any software that accepts CSV or XLSX imports.

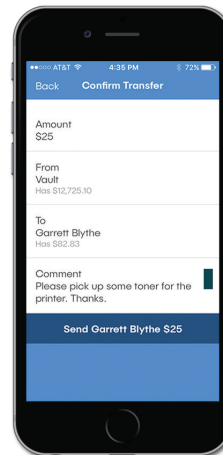

How it works

-  Team member requests funds for company expenses.
-  Administrator approves request and funds become immediately available on team member's dash card.
-  Team member makes a purchase, which then shows in the dash app.
-  Team member can add details to the transaction and take a photo of the receipt from the app.
-  Administrators can see every purchase detail for all members, track spending, and generate reports.
-  Unused funds can instantly be returned to the dash company vault.
